

Collating

Contributed by Webmaster

Horizon collators are fast and accurate. They operate stand-alone or can link to Horizon sticther/trimmers for automated feeding of uncollated sets. You won't find performance, flexibility and productivity at this price anywhere else.

{tab=Horizon}

The VAC-100 is a 10-bin rotary feed, air-suction collating tower. User-friendly with intuitive touch-screen controls. Expandable up to 6 modules (60 sheets or 240 pages). Highly flexible with a range of jogging and stacking options available.

[vac100_brochure](#)

The VAC-60 is similar to the 100, modular, suction-feed collator expandable to 6 towers, but with 6 higher capacity bins per tower. 5,500 sets per hour productivity.
