

Converting - Digital Web

Contributed by Phillip Rennell

AB Graphic International is the worldwide market leader in label converting solutions for digitally printed web. The Digicon Series 2 is specifically designed for converting HP Indigo digitally printed web into finished saleable product in a single pass with maximum efficiency and minimum waste. With its modular design the Digicon Series 2 can handle the highest levels of embellishment required by the most demanding buyers and it can be configured offline or in-line with the HP Indigo ws4500 & ws6000 digital offset label presses.

MAJOR BENEFITS OF THE OMEGA DIGICON SERIES 2

- FULLY MODULAR - minimises initial investment and machine capabilities can be increased as & when required
- FULLY AUTOMATED PRE POSITIONING OF PRINT AND CONVERTING UNITS - ensures minimum wastage and quickest make ready times
- SEMI ROTARY WEB MOTION with dial in repeat lengths, only one cylinder size and no gears or shafts to change
- SERVO DRIVEN WEB TENSION CONTROL capable of handling a very wide range of substrates

- ERGONOMIC DESIGN combined with exceptionally high quality engineering and world wide leading components ensures long life and reliability
- WIDEST RANGE OF CONVERTING SOLUTIONS to enable you to meet your customers needs and demands
- SOLE STRATEGIC PARTNER TO HP INDIGO for label converting solutions with hundreds of existing satisfied customers

The brochure below details the incredible flexibility and extensive functionality of this remarkable piece of technology.
