

Horizon

AFC-56 Series

Computerized Cross Folder AFC-566F / 566AKT / 564AKT

**Automated set-ups ensure
user-friendly operation
and consistent folding.**

Comfortable folding operation

High performance, space efficient automated cross-knife folding machines - The Horizon AFC-56 series feature advanced automation with user-friendliness and high quality folding.

Photo : AFC-566F + Round Pile Feeder Unit RFU-54 + Mobile Knife Fold Unit MKU-38 + Press Stacker PST-44

AFC-56 series - AFC-566F, AFC-566AKT and AFC-564AKT - Features

1. Set-up a wide variety of fold patterns by simply touching the corresponding icon and inputting the sheet size on the large LCD color touchscreen.
17 fold patterns are set on **566F** **566AKT** , 14 fold patterns are set on **564AKT** .
2. Automated setups take just a few seconds. The LCD touchscreen prompts the operator through all remaining settings for fast, efficient production. All adjustments are user-friendly and require minimal skill or training.
3. All roller gap settings can be performed automatically through the LCD touchscreen inserting a single sheet at the caliper. **566F**
4. Standard wireless remote controller for more convenient operation. **566F**
5. Fold rollers are constructed with a combination of steel and soft polyurethane for superior grip and sharp, consistent folding.
6. Horizon's advanced rotary suction feed system delivers fast, consistent feeding on a wide range of paper stocks.
7. The optional extension table enables to load the sheets up to 1,100 mm / 43.3" long.
8. Up to 200 job settings can be memorized for quick and easy recall of regular job.
9. The optional pXnet bindery control system makes job scheduling and tracking for the AFC-56 series super efficient, or accept JDF setup data from an upstream workflow.

AFC-56 series Features

Automated Setup

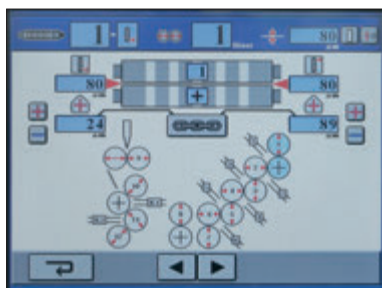

17 fold patterns are automatically set by selecting the sheet size and fold pattern on the LCD touch-screen. Each section is set automatically by high precision stepper motors for high quality folding.

* 14 fold patterns are set on the AFC-564AKT.

566F

All roller gap settings are automated for the actual sheet thickness inserted to the caliper.

Color LCD Touchscreen

The 10.4 inch color touchscreen is icon-based for user-friendly operation. The graphical interface screen provides intuitive operation for folding setup, speed adjustment and all other fine-adjustments.

Superior Folding Quality

Superior and consistent fold quality is ensured with steel and soft-formed polyurethane combination rollers. A high precision stepper motor is employed for fine-tuning in 0.005 mm steps with a simple touch of the + or - button.

566F

566AKT

6 Buckle Plates

The AFC-566F and AFC-566AKT is equipped with 6 buckles, 1 cross knife and 2 buckles under the cross knife, allowing a wide variety of fold patterns in minimal floor space.

* The AFC-564AKT is equipped with 4 buckles.

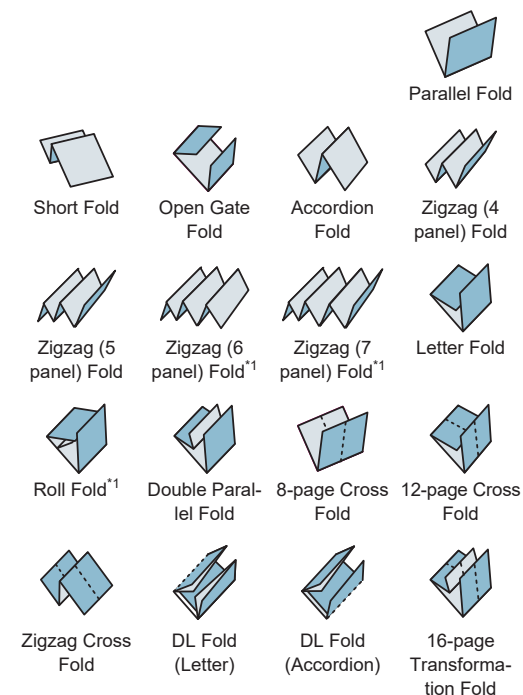

Automated Setup Sections

566F	38 sections (All sections listed below)
566AKT	12 sections
564AKT	10 sections

- Suction Head
- Table Guide
- Side Lay Guide
- 1st Buckle
- 2nd Buckle
- 3rd Buckle
- 4th Buckle
- 5th Buckle
- 6th Buckle
- Knife Stopper
- Knife Guides (Front / Rear)
- K1 Buckle below Knife
- K2 Buckle below Knife
- Roller Gap for 1st through 7th Rollers (Front / Rear)
- Perforation Rollers (Front / Rear)
- Knife Rollers (Left / Right)
- Roller Gap for 8th through 10th Rollers (Left / Right)

Automated Setup Fold Patterns

566F	17 fold patterns (All patterns listed below)
566AKT	17 fold patterns (All patterns listed below)
564AKT	14 fold patterns (Except for the patterns marked with *1.)

Nonstandard fold patterns can also be set up automatically by inputting the setup size for each fold.

High-speed Feeder

Horizon's advanced rotary suction feed system with side blowing assist air for fast, consistent feeding of a wide range of paper stocks.

566F

The supersonic and photoelectric double feed detect sensors come standard for superior detection.

The above photos show the AFC-566F.
Left Photo: Side blowing assist air is an option for the AFC-566AKT / 564AKT.
Right Photo: Supersonic sensor is an option for the AFC-566AKT / 564AKT.

Remarkable Features of the Fully-Automatic AFC-566F

566F

AFC-566F now has many key productivity and user-friendly design enhancements.

Wireless Remote Controller

Wireless remote controller enables common operations and adjustments to be performed from all areas of the system for greater flexibility, performance and ease-of-use.

Photo : AFC-566F + PST-44

New features for efficient production.

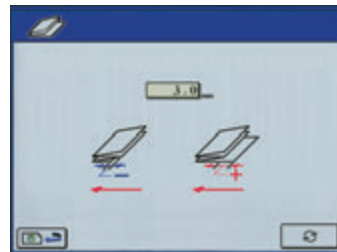

Advanced double feed control

Newly designed double sheet control system allows double feeds to stop immediately on the register table for ease of recovery and reduced machine downtime.

Signature set up based on fold marks.

Signature can be set up based on a fold mark in a printed job. Just by inputting the distance between edge of the sheet to the folding mark, the signature can be set up exactly to the imposition.

Quick adjust for accordion fold

In case a sheet is not folded evenly in the accordion-fold. Simply input the measurement of difference on the last fold, and the folding is corrected instantly.

Intermittent conveyer movement

Intermittent conveyer movement mode can be selected to neatly stack the folded sheet on the delivery conveyer.

Maintenance reminder screen

This screen reminds the operator of maintenance needs such as lubricating timing and filter cleaning to keep the machine in good condition.

Further Details

Buckle

Specially-coated buckle plates minimize paper friction to maintain fold accuracy. All the buckles are set up automatically with precise stepper motor drives for the sheet size and fold pattern selected. Each buckle has an integrated deflector/stopper.

Knife Fold Section

Knife timing and knife angle can be adjusted easily. The servo motor controlled knife enables high-speed folding. Transport belts (four belts for AFC-566F, two belts for AFC-566AKT / 564AKT) and hold rollers ensure consistent transportation even for two-up applications.

Delivery Conveyor

Conveyor height is easily adjusted by the hand wheel to the proper sheet delivery height.

Folding Roller Below Knife

The uniquely designed combination of soft polyurethane foam rubber and steel rollers have superior grip for sharp, consistent folding.

Sub Operation Panel

Start, Stop, Inching, Single Knife-actuation, and Test Feeding are performed at this panel.

Perforation

Perforation, slit perforation, scoring, slitting and strip trimming can be performed inline. The perforation shaft is quick and easy to install or detach. Perforation shaft lifts up from the screen for easy perforation/scoring positioning.

Control Panel

An icon-based color interface provides easy operation. For set-ups, simply select one of the fold patterns from the graphical display and input sheet size. Up to 200 job settings can be memorized for quick and easy recall of regular jobs.

Suction Head

An innovative detection system is employed for accurate and stable suction head positioning to achieve consistent feeding.

Feed Rotor

Horizon's advanced rotary suction feed system for fast, consistent feeding of a wide range of paper stock.

Feed Table Knob

The feed table knob can adjust the table position to fine-tune the sheet feeding position.

Sheet Transportation

The side lay guide is coated with a special anti-static plating. The newly designed rigid side lay guide ensures accurate and smooth transportation of a wide range of paper stocks.

Folding Rollers

The uniquely designed combination of soft polyurethane foam rubber and steel rollers have superior grip for sharp, consistent folding. The fold roller system employs helical gears for quiet operation and flexible cross couplings for minimal wear.

*The right photo shows the AFC-566F. Roller gap is automatically set on the AFC-566F only.

Photo : AFC-566AKT

Optional Accessories

Round Pile Feeder Unit RFU-54

The RFU-54 can be attached or detached without removing the standard flat pile feed table, making it quick and easy to interrupt long runs for short-run jobs. An error feed tray is equipped for continuous feeding operation.

Gluing Unit CGU-50

The gluing unit can produce 8-page or 12-page glued booklets and direct mail applications.

Gluing Unit Controller

Glue Gun

Front Perforation Unit FP-56 (Factory Option)

This unit permits perforating before folding. A hardened blade drum provides for high-precision micro perforation. Optional skip perforation (FSP-56) is available.

Strip Trim Device AF-ST5 / ST5N

Strip trimming after the parallel fold section can be performed using slitters for multiple-up jobs. Stripped width can be adjusted. (3 mm to 10 mm at 1 mm intervals)

Strip & Edge-Trim Device CGU-T56F

Center strip trim and edge trim are available under the cross knife. Segmented rollers allows flexible adjustment of the cutting positions. (CGU-T56 is available for AFC-566AKT / 564AKT.)

Gate Fold Buckle GFB-56

The gate fold buckle can be set up quickly, with no special skill for precise, accurate closed gate folding.

Blades

A wide variety of optional blades are available for various applications. (Blades in the photo are examples.)

Unit : mm (Cut x Blank)

Press Stacker PST-66

Strong press at maximum 1.2 ton is applied to produce flat signature and folded pieces. First roller removes the air and second roller compresses the signature to reduce bulk. Batch separation is available to maximize productivity.

Press Stacker PST-44 / PST-44L

Strong press at maximum 4 kN is applied to produce flat signature and folded pieces. First roller removes the air and second roller compresses the signature to reduce bulk. Batch separation is available to maximize productivity.

Mobile Knife Fold Unit MKU-54T

The MKU-54T is mobile knife unit equipped with the buckles below knife. It is capable of the letter fold after 8-page cross fold.

Press Stacker with Pile Delivery PSX-56 / PSX-56R

Stacked signatures or booklets are delivered to a comfortable height for easy packaging. Applications can be stacked 1-up, 2-up or 3-up for efficient production. Rigid, large diameter rollers apply 1.2 tons of pressure for crisp, tight and flat folds.

Standing Delivery Unit ED-40S

Standing delivery stacker increases the efficiency for sheet packing. Batch kicking function allows accurate counting.

Option List

Feeder Section

Name	Model	Description	Factory Option	566F	566AKT	564AKT
Round Pile Feeder Unit	RFU-54	Mobile round pile feeder.	No	Yes	Yes	Yes
Extension Table	LT-56	Enables to load sheets up to 1,100 mm / 43.3" long.	No	No	Yes	Yes
	LT-56F		Yes	Yes	No	No
Supersonic Detector	SD-56 / SD-56C	Detects space between sheets for accurate double feed detection even with a solid black printed sheet.	No	Standard	Yes	Yes
Side Blowing Unit	-	Side blowing assist air for stable feeding.	No	Standard	*	*
Image Checker	-	A camera scans the printed image to identify any blank or misloaded sheets.	No	*	*	*
Barcode Reader	-	Barcode scanning at resistor table for higher security control.	No	*	*	*
Ionizer	-	The ionizer reduces the static on the paper to minimize static related feed/folding issues.	No	*	*	*

Folding Section

Name	Model	Description	Factory Option	566F	566AKT	564AKT
Gluing Unit	CGU-K56 + CGU-50	Gluing gun and controller to produce glued booklet.	No	Yes	Yes	Yes
Front Perforation Unit	FP-56 ^{*1}	Front perforation unit. Only available as factory option.	Yes	Yes	Yes	Yes
Skip Perforation Unit	JM-AFC	Skip perforation unit. only available with FP-56.	No	*	*	*
Strip Trim Device	AF-ST5 / AF-ST5N	Strip trimming after the parallel fold section for multiple-up jobs.	No	Yes	Yes	Yes
Edge Trim Device	AF-ET5 / AF-ET5N	Edge trimming for the parallel fold section.	No	Yes	Yes	Yes
Punch Perforation Unit	AF-PP5	Punch perforation for 8 or 12 page signature for deep glue penetration when producing perfect bound book.	No	Yes	Yes	Yes
	AF-PP5N		No	Yes	Yes	Yes
Strip Trim Device below Knife	KT-ST5	Strip trimming after the cross fold section for multiple jobs.	No	*	*	*
Strip & Edge Trim Device below Knife	CGU-T56F	Strip and edge trimming for 8-page or 12-page signatures.	No	Yes	No	No
	CGU-T56		No	No	Yes	Yes
Edge Trim Device below Knife	CGU-T56FN	Edge trimming for 8-page or 12-page signatures.	No	Yes	No	No
	CGU-T56N		No	No	Yes	Yes
Punch Perforation Unit below 1st Knife	KT-PP56 ^{*2}	Punch perforation for 16-page signatures with cross knife unit connection.	No	Yes	Yes	Yes
Gate Fold Buckle	GFB-56	Gate fold buckle to produce closed gate fold application.	No	Yes	Yes	Yes
Hard Urethane Roller for Parallel Fold	-	The wear-resistant hard urethane rollers. (segmented)	No	*	*	*
Sound-Proof Cover (Full Cover)	AF-FCV566	The sound proof cover achieves quiet and safe operation.	Yes	Standard	AF-FCV566	AF-FCV564
	AF-FCV564				Yes	Yes
Sound -Proof Cover (Upper Cover)	AF-UCV566	The sound proof cover achieves quiet and safe operation. This cover is available only for the buckle chute section.	Yes	No	AF-UCV566	AF-UCV564
	AF-UCV564				Yes	Yes
Flat Deflector (Parallel)	-	The flat type deflector. Replaces the parallel folding buckle.	No	Yes	Yes	Yes
Flat Deflector (Below Knife)	-	The flat type deflector. Replaces the buckle below knife.	No	Yes	Yes	Yes

Delivery Section

Name	Model	Description	Factory Option	566F	566AKT	564AKT
Press Stacker	PST-66	Up to 660 mm / 26" width sheets can be received. 1.2 tons of pressure can be applied for tighter fold quality.	No	Yes	Yes	Yes
Press Stacker	PST-44 / PST-44L	Up to 440 mm / 17.3" width sheets can be received. Two models are available depending on space requirements.	No	Yes	Yes	Yes
Press Stacker with Pile Delivery	PSX-56	Tightly pressed signatures are stacked and delivered at a comfortable height.	No	Yes	Yes	Yes
Press Stacker with Pile Delivery	PSX-56R	Tightly pressed signatures are stacked and delivered at a comfortable height. The PSX-56R is for opposite delivery direction.	No	Yes	Yes	Yes
Mobile Knife Fold Unit	MKU-54T	Mobile knife unit with buckle under the knife.	No	Yes	Yes	Yes
Mobile Knife Fold Unit	MKU-38	Mobile knife unit for additional knife fold.	No	Yes	Yes	Yes
Standing Delivery Unit	ED-40S	Standing delivery for easy handling and packaging.	No	Yes	Yes	Yes
